
Research Program

Tokenization for Sustainable Finance

A one-year research program focused on **tokenization for sustainable finance**

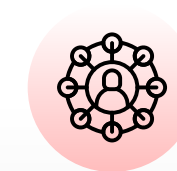

- The program emphasizes creating **open-source reference implementations** of tokenization systems, grounded in real-world experiments conducted with ecosystem players.
- It will investigate the integration of **international financial standards, industry principles, and the Finance 5.0 framework** to offer practical solutions for supporting green finance.
- This initiative follows FeverTokens' success in extending the **solbond model** to include green bonds, as showcased during the **UAE COP28 TechSprint**, and builds upon previous efforts in the tokenization of development finance institution (DFI) protocols for climate finance.
- The **collaboration with ReTech Center at École des Ponts Business School** is designed to blend academic research, industry collaboration, and innovation to maximize the impact of the tokenization systems on global finance.

Principles & Standards

Open Implementations

Ecosystem Experiments

We invite **key partners in finance and blockchain** to join the program

A unique opportunity for forward-thinking financial and blockchain industry leaders to contribute to the future of sustainable finance.

- A **collaborative ecosystem** that bridges academia, research, and industry innovation.
- High-profile **events** to offer excellent networking opportunities for with key industry players.
- Exclusive **working groups and technical workshops** for hands-on experience and participation in developing key protocols and standards.

Executive Training

Your organization will get access to École des Ponts' renowned executive training programs, focused on sustainable finance, blockchain, and Finance 5.0. This will empower your leadership and teams with cutting-edge insights and skills.

Branding & Events

Your organization will be featured in the program's deliverables and reports and also have access to showcase opportunities and participation in the ReTech Conference and Annual Conference on Finance 5.0.
